1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

Claim 1:

Lines 4-5, "the first matching stage" has been changed to --the inverting first matching stage--;

Lines 8-9 and 11, "the first pull-up stage" has been changed to --the inverting first pull-up stage--.

Claim 8:

Line 2, "the first output stage" has been changed to --the inverting first output stage--;

Lines 5-6, "the second matching stage" has been changed to --the inverting second matching stage--;

Line 1, "the second pull-up stage" has been changed to --the inverting second pull-up stage--.

Claim 9:

Lines 5-6, "the first matching stage" has been changed to --the inverting first matching stage--;

line 10, "the first pull-up stage" has been changed to --the inverting first pull-up stage--.

Claim 12:

Art Unit: 2816

Line 1, "the first matching stage" has been changed to --the inverting first matching stage--.

Claim 15:

line 1, "the first pull-up stage" has been changed to --the inverting first pull-up stage--.

Claim 18:

Lines 2-3, "the first output stage" has been changed to --the inverting first output stage--;

Line 5, "the second matching stage" has been changed to --the inverting second matching stage--;

Lines 7 and 9, "the second pull-up stage" has been changed to --the inverting second pull-up stage--.

Claim 20:

Line 11, "the first pull-up stage" has been changed to --the variable first pull-up stage--.

Claim 23:

Line 10, "the second pull-up stage" has been changed to --the variable second pull-up stage--.

The changes have been made to provide antecedent basis and to place the application in a condition for allowance.

2. The following is an examiner's statement of reasons for allowance: the amendment filed 1/24/2005 has overcome the prior art of record. The prior art of record fails to teach or fairly suggest an inverting first output stage coupled to the first inverting first pull up stage to generate a third inverted signal in response to the second inverted signal and the inverting first pull up

stage being configured to generate a variable phase delay in the second inverted signal and the third inverted signal as called for in claim 1, the first pull up stage being configured to generate a variable amount of phase shift in the second inverted signal and an automatic test equipment coupled to the inverting first pull up stage to adjust the variable amount of the phase shift in the second inverted signal as called for in claim 9, adjusting the first the pulse width change to substantially equal to the second pulse width change to provide the second inverter waveform with an approximately 50% duty cycle, adjusting the variable first pull up stage to obtain a selected first phase shift of the second inverted waveform as called for in claim 20, the first matching stage including a non-inverting logic element having an input to receive the input clock signal a NOR gate with one input connected to the input of the non-inverting logic element and another input connected to an output of the non-inverting logic element as called for in claim 25. Therefore, claims 1-3 and 6-26 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Lam whose telephone number is 571-272-1744. The examiner can normally be reached on Monday to Friday (7:30 am to 6:00pm).
